Opis produktu

The new FMGK1 has been designed and machined specifically to fit the Hyundai i30N/i20N/Veloster N, this shift knob is a result of extensive development. The aluminium billet chosen for this project is machined here at Forge HQ, in Gloucestershire UK. It's shape, like a piston head, combines functionality and design, fitting perfectly in the hand for the short precise shifts.

Many months of testing and many different prototype examples have been made in order to find the perfect weighted shift knob; we have now created the perfect bespoke Hyundai shift knob.

Not to be confused with universal fitting shift knobs this is a straight replacement for the OE equipment which has been a fully engineered solution to improve your overall driving experience of your Hyundai N vehicle.

Main benefits

- **Bespoke design to enhance interior.**
- **Optimised shape for comfort and grip.**
- **Perfect weighting for slick gear changing.**

Available in brushed, anodised black and anodised red finish.

Our products are packaged using high density foam to guarantee they are delivered to your door in perfect condition.

The design has been created to reflect the N style and will look resplendent in your car.

Knob weight

176.4 grams or 6.22 ounces
