Opis produktu

The Hyundai i30N and i30N Facelift Remap, **available in Stage 1 and 2**, is a high-quality performance enhancement designed to maximise the potential of your Hyundai i30N. Our team has dedicated significant time and effort to develop a range of [performance products](#) specifically for this model, ensuring that our remap is tailored to **perfectly compliment and maximize the capabilities of our upgraded hardware**. By implementing our custom remap, you can unlock the full potential of your Hyundai i30N. Our remap is carefully designed to optimise engine performance, improve throttle response, and increase overall power and torque of your vehicle. With Stage 1 and Stage 2 options available, you have the flexibility to choose the level of performance enhancement that best suits your preferences and driving style.

Our Hyundai i30N and i30N Facelift Remap offers **improved performance** making it a versatile choice for both enthusiastic drivers and daily commuters. Experience a **noticeable difference in acceleration** and enjoy a more exhilarating driving experience with our **high-quality remap** that is specifically engineered for the Hyundai i30N model. Upgrade your Hyundai i30N and unlock its true potential with our custom remap, allowing you to experience enhanced performance, improved fuel efficiency, and a thrilling driving experience every time you hit the road.

□ **Night and day difference. The torque improvement is massively entertaining and it pulls incredibly strong through every gear, brutal acceleration but very composed and linear too. Highly recommended!** □

□ **Huge difference. Very impressed** □

Stage 1 (+29 BHP, +62Nm)

Our stage 1 ECU calibrations for Gen 1 vehicles allows power and torque to be increased from Hyundai's claimed 271bhp/378Nm to over 300bhp/440Nm, a **gain of +29 BHP & +62Nm**.

Stage 2 (+49BHP, +82Nm)

Our stage 2 ECU calibrations for Gen 1 vehicles allows power and torque to be increased from Hyundai's claimed 271bhp/378Nm to over 320bhp/460Nm, a **gain of +49BHP & +82Nm**.

Gen 2 - Stage 1 (+60BHP, +68Nm)

For Gen 2 vehicles power and torque is increased from 280bhp/392Nm to 340bhp/460Nm torque for stage 1 software, **a gain of +60BHP & +68Nm**. Stage two software is also [available](#).

Our fully re-calibrated engine management system, provides **significant increases to both power and torque**. This customised ECU mapping uses our bespoke software which has been developed on the road to improve real
