Induction Kit for Audi TTS

Cena brutto	2 094,80 zł
Cena netto	2 094,80 zł
Dostępność	Na zamówienie
Numer katalogowy	379175499
Kod producenta	FMINDTTS
Kod EAN	*5056721229065*

Opis produktu

We have built up quite a reputation over the years for creating efficient induction kits for VAG cars which are highly respected in the market place. Everything needed to upgrade the car's induction capability is included in the kit, including the hand-fabricated intake pipework, all silicone hoses and clips and of course, the stunning carbon-clad filter. Our kit channels ice cold air from the front ensuring that the largest volume, of the coolest possible air, is available to the engine. The combination of the large filtration area, maximises efficiency and improves the drivability and torque throughout the rev range. We must not forget, that this kit really does happen to look rather smart too! The factory MAF sensor is retained, meaning the Forge induction kit integrates seamlessly with the factory management system to provide the perfect basis for enhancing a stock car – or an essential part of higher-level tuning, remapping or additional exhaust mods.

You can find a replacement filter [here](#).

*** This product is only available in BLACK with BLACK hoses only. ***

Please watch [our video](#) on how to fit an air filter without damaging it.

DO NOT OVER TIGHTEN

When fitting the filter to its counterpart please ensure you do not over tighten the hose clamp connecting them. Doing so could result in the part being crushed, leading to fitment and/or performance issues. The recommended torque setting for this hose clamp is 2-2.4Nm
