Opis produktu

- **Gains of 6 BHP**
- **Choice of colours**
- **Lifetime warranty**
- **Design and manufactured in the UK**

The kit is suitable for the **Citroen DS3 1.6 Turbo**, the **Peugeot RCZ THP 156** and the **207 GT/GTi**. We use a custom designed Silicone Hose combined with a non-oiled Pipercross foam high flow filter - you can find a replacement filter [here](#). Everything needed is supplied in the kit, including the highest quality stainless steel clamps.

Our Dyno testing of this kit showed **improvements of 6 horsepower** over the stock airbox on a standard engine with greater improvements on tuned vehicles. Whilst Power gains may vary depending on your modifications and level of tune, if you desire even more performance, this has to be the perfect choice. The filter is located directly in front of the cold air duct into the engine bay. This kit also **significantly tidies up the engine bay** by removal of the OEM airbox and associated cold air ducting.

PLEASE NOTE: This product is only suitable for the petrol models. This product will not fit the DS3 Racing/DS Automobiles DS3 - *Please note - the Pipercross filter is excluded from the Forge lifetime warranty*
