Opis produktu

This Forge Motorsport intake kit is for the SKODA FABIA 1.0 TSI 2017 onwards. This intake kit includes a **bespoke aluminium housing**, powder coated black for that OEM look and hard wearing finish. This has a dual purpose of drawing air from the cold air inlet on the slam panel and shielding that cold air from the heat of the engine.

The Forge silicone hose has a larger bore and smooth finish inside giving optimum flow and comes in a choice of 3 colours; black, red or blue. Please select colour from the drop-down list.

- The construction of this hose has been engineered to exceed that of the OEM fitments and will enhance any engine bay both technically and aesthetically
- Lifetime warranty*

The filter is manufactured to Forge's specifications by [Pipercross](#), and a replacement filter can be found [here](#).

- Washable and reusable design.
- Layered multi-density foam technology.
- Designed and manufactured in Great Britain.
- Improvement in engine power and torque with superior engine protection from dirt and dust ingress.
- Designed to flow stronger for longer.

Fitting is straightforward and can be completed in 20-30 minutes. This kit requires no cutting or modification to the vehicle, allowing it to be reversed back to stock.

Please note - the Pipercross filter is excluded from the Forge lifetime warranty

DO NOT OVER TIGHTEN

When fitting the filter to its counterpart please ensure you do not over tighten the hose clamp connecting them. Doing so could result in the part being crushed, leading to fitment and/or performance issues. The recommended torque setting for this hose clamp is 2-2.4Nm
