Opis produktu

Following a running change to the 2015 Ford Focus ST250, we have re-engineered this performance induction kit to suit. Quality CNC Mandrel bent alloy inlet pipe work with no joins, quality 4 ply silicone hoses, and a high performance PiperCross filter increase filtration and flow.

As always we supply everything required for an easy installation. This kit is compatible with 2015 onwards cars fitted with the twist type induction sensor located on the intake pipework next to the airbox as shown below:

Please note - the Pipcross filter is excluded from the Forge lifetime warranty

If you do have the pre 2015 model, please see [FMINDST250](#). A replacement filter for this induction kit can be found [here](#).

Please note: The engine cover cannot be fitted back to stock after installation of this kit
