Induction Kit for the Ford Focus ST250

Cena brutto	2 735,74 zł
Cena netto	2 735,74 zł
Dostępność	Na zamówienie
Numer katalogowy	379175096

Opis produktu

With Forge products the performance and quality always comes first, and this kit really goes out it's way to prove it. With a re-design of the inlet pipe work in alloy, and teaming up with the engineers at PiperCross, who have become famous for extracting extra horsepower on the British Touring Car circuit, we now have a kit which unleashed an extra 17BHP on our Ford Focus ST250 test car.

As always we supply everything required for an easy installation. The silicone hose is available in a choice of blue or black, so simply select your choice in the options above, when ordering.

This kit is compatible with pre 2015 cars fitted with the bolt on type induction sensor located on the intake pipework next to the airbox as shown below:

If you do have the post 2015 model, please see [FMINDK4](#). The replacement filter for this part can be found [here](#).

Please note - the PiperCross filter is excluded from the Forge lifetime warranty

Please also note: The engine cover cannot be fitted back to stock after installation of this kit
