Opis produktu

This induction kit is designed for the 1.4 Turbo 122/125hp engines (not Twin Charged) engines as found in the SEAT Leon, Golf Mk5, and Audi A3. Utilising a high-quality carbon fibre cannister assembly and housing the Forge Motorsport designed Cotton filter, the components are protected from the engine bays high temperatures, the filter has a direct air feed utilising high quality ducting.

During comprehensive testing we found an increase of 5 BHP when the intake was installed and with a stage 1 tuned car over the factory airbox. This intake will give an all-round improvement to the airflow entering the engine, also helping to reduce turbo lag and give the owner that race sounding induction noise

The custom designed silicon hose is available in Red, Blue or Black.

- The Forge silicone hose in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- Lifetime warranty

Please watch [our video](#) on how to fit an air filter without damaging it.
