Opis produktu

This Forge Motorsport high flow intake hose for the VW T5 1.9 TDI 2003 - 2010 eliminates the highly restrictive plastic inlet pipe, and replaces it with our smooth bore multi-ply silicone hose which increases air flow, improving efficiency and performance.

This hose is specifically designed for the **AXB**, **AXC** and **BRS** engine codes to replace OEM Part No. 7H0 129 615 D

Available in red, blue, or black, and is supplied with all necessary hose clamps and joiners for a straight forward fit.

The Forge silicone hose in this kit has been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.

- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) but more importantly for this application, air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
