Intake for the Ford Fiesta Mk7/7.5 1.0 Ecoboost

Cena brutto	1 097,18 zł
Cena netto	1 097,18 zł
Dostępność	Na zamówienie
Numer katalogowy	379175898

Opis produktu

The 1.0 Ecoboost engine runs a small turbocharger so the key to releasing power from the engine is minimising restriction, which is exactly what the Forge Motorsport intake does. Featuring a fully CNC machined MAF housing and pipe that matches the standard Ecoboost housing exactly, coupled to a large air filter (available in either foam or cotton), the Forge Motorsport Ecoboost intake looks as good as it sounds, with a **noticeable increase in induction and dump valve recirculation noise.**

The kit comes complete with all parts necessary to fit, including a large heatshield in order to **reduce inlet temperatures.** Full instructions are included. We recommend that you allow yourself 1-2 hours to complete the full installation of this Forge product. Make sure to familiarise yourself with the [instructions](#) before undertaking the job also.

☐ **Fast postage, fits perfect, induction sound is awesome. One of the best kits I have ever fitted. Thanks Forge** ☐

***Please note - the filter is excluded from the Forge lifetime warranty*. For the replacement filters for this kit,**

please see [here](#) and [here](#).

Please watch [our video](#) on how to fit an air filter without damaging it.
