Intake for the Ford Fiesta ST180

Cena brutto	731 499 999,93 zł
Cena netto	731 499 999,93 zł
Dostępność	Na zamówienie
Numer katalogowy	379175667

Opis produktu

The Forge Motorsport intake system for the **Ford Fiesta ST180** features a large diameter [Ram Air](#) high flow, pleated, synthetic nanofiber filtration filter, for **superior filtration and enhanced breathing for the engine** - but also featuring a larger surface area than the stock filter and many competitors. The MAF housing is CNC machined in our Gloucester machine shop and gently tapered internally so as to ensure **maximum flow** whilst emulating the stock configuration to eliminate the possibility of any engine check lights.

We also provide a laser cut and powder coated aluminium shield which sits under the filter and directs air around the filter that enters the bay through the bonnet slam panel.

During testing we have achieved gains of up to **11bhp** when installed in conjunction with an engine remap, which is generally needed in order to make the most of the improved airflow. This filter kit can also be installed in conjunction with our silicon intake pipe. You can find a replacement filter for this kit [here](#).

***Please note - the filter is excluded from the Forge lifetime warranty. Please watch [our video](#) on how to fit an air filter without damaging it. You can find a replacement filter for this intake [here](#)**
