Opis produktu

This updated intercooler has been designed as an upgrade Mini Countryman Cooper S models. After considerable trials with different intercoolers cores, we found that the most efficient for these models, was an intercooler of bar and plate design, and along with a significant overall increase in dimensions we have been able to improve the cooling ability and reduce the pressure loss across when compared to stock.

Our own road and dyno testing showed that our intercooler was twice as efficient as the original intercooler with the inlet temperatures halved.

The updated intercooler is supplied with all parts required for the installation and comprehensive instructions.
