Opis produktu

With modern day aftermarket ECU tuning pushing powerful engines harder, in certain conditions the vehicle will run the risk of receiving inadequately cooled air affecting the engines efficiency and ultimately losing power.

With this in mind Forge Motorsport are proud to release their Intercooler solution for the Ford Fiesta 1.0 Ecoboost. Following exhaustive testing on the road and dyno working with 3 different manufacturers of air core, we are proud to present the ultimate in front mount intercoolers for the Fiesta.

This intercooler is a clear market leader:

- Twice the internal cooling capacity over the OEM intercooler
- 300% larger cooling surface area
- More than 25 degrees C cooler intake temperatures on a mapped stage 2 car.
- The largest intercooler on the market
- Unlike our competitors this intercooler kit is supplied with our own Forge branded silicone boost hoses
- All of the Forge boost hoses have been designed to include an expensive inner liner of modified silicone known as Flurosilicone which means that the hoses are suitable for use in areas that may see oil mist i.e. boost hoses. The use of a Flurosilicone liner ensures that Forge silicone hoses are the best, longest lasting, and preferred choice of the discerning car enthusiast.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically.
- No gimmicky 3 year warranty. We stand behind our products and will give you the Forge Market leading **Lifetime warranty**
