Kod producenta	FMINTVWT5
Kod EAN	*5056721232935*

Opis produktu

Upated front mounting intercooler for the VW T5 bus or van variants. Although significantly larger than the original intercooler, this unit is a direct plug in replacement requiring no additional hoses or pipework. With a larger front cross sectional area, the cooling/power recovery is improved. The unit offers a lower resistance, compared to OEM without adding turbo lag. On our own van we **gained 10hp and 20 ft/lbs of torque** with just the intercooler, and all who drive the vehicle since the installation have commented on how much better it feels.

For those that have used a tuning box, or have updated engine management software, this really is a must.

Stock Intercooler: 720x215x30

Forge Intercooler: 680x290x40

Fits the following engines: AXB, AXD, AXE, AXC, BRR, BRS, BNZ, BPC, BLU, CAAA, CAAB, CAAC, CAAD, CAAE, CCHA, CCHB. This will also fit the 2010 onwards VW T5.1 2.0TDI single turbo 140bhp, 114bhp, 102bhp, & 84bhp models.

☐ **Received my new Forge Intercooler, firstly, packaging was incredible and could have fallen out of a plane and survived, upon opening, greeted by something that could easily be described as a work of art, alloy welding was stunning, full fitting instructions are included, fitted with ease and looks fabulous, along with the Forge hose kit I recently purchased this has transformed the van** ☐
