Intercooler Type 08 680 x 80 x 200mm Forge Motorsport FMINT108U.635.EQ 63.5mm

Cena brutto	1 700,00 zł
Cena netto	1 382,11 zł
Numer katalogowy	FO-FMINT108U.635.EQ

Opis produktu

FORGE universal intercooler Type 08 - 2 low side connections - 680x80x200mm Series 100 - 60 mm thick core Forced induction (intake air compression) produces heat. The heat can reduce power, negating some of the benefits of forced induction. The incorporation of an intercooler greatly reduces the negative effects of high intake air temperatures. FORGE Motorsport's range of universal intercoolers offers a wide selection of the highest quality configurations, handcrafted and welded by highly skilled craftsmen, offering excellent thermal properties, flow characteristics, minimal pressure drop and high volumetric efficiency. This universal FORGE range can provide the perfect solution for vehicles where no specific kit exists yet. A good starting point is to determine the physical space available to mount an intercooler and use the dimension tables to check what will fit. Then, by looking at the variations in type (position of connecting pipes, proposed diameters and type of fixing to the intercooler), decide how the pipes should be routed and connected. Consideration should also be given to how the intercooler will be fixed or mounted. In almost all cases, when using a universal intercooler, the installer must have an appropriate level of technical competence. 100 Series UniversalType 08 : 2 low side connections Core dimensions - L x W x HType 04/05/06/07/08/09: 500 x 60 x 175mm Overall dimensions - L x W x HType 08: 680 x 80 x 200mm Diameter (outer diameter of the tubes): 63.5mm
