Opis produktu

Purelux Strobe Ultra Slim 8W is a stylish, recessed LED warning and strobe light designed for heavy equipment and work vehicles. Thanks to its ultra-slim recessed design, the light integrates discreetly into the vehicle body, making it ideal for installation at the rear, side, or bumper of the vehicle. The Strobe Ultra Slim is equipped with four powerful amber 5 W LEDs and offers up to eight different flashing modes. Its compact size and clean design ensure a professional appearance while delivering high visibility in demanding working environments. The light is road-approved according to ECE R65 Class XA1, meaning it can be used in live traffic during road works. With a wide operating voltage range, it is compatible with both 12 V and 24 V systems. The unit is also EMC-protected according to ECE R10. Multiple lights can be synchronized to flash simultaneously or alternately, allowing flexible and uniform warning light configurations. A 24-month warranty is included.
