Opis produktu

Engineered with only one internal 90-degree turn in the nitrous flow path, a true .375 orifice makes this solenoid a must-have for any serious competitor. The 375 minimizes nitrous boiling and delivers a denser form of liquid nitrous to the system, resulting in a cleaner running and easier-to-tune nitrous system. The 375 is engineered to accept up to a 10AN inlet fitting and a 6AN outlet fitting and has an integral purge port allowing clean pure nitrous to be drawn across the inlet orifice to ensure a repeatable solenoid reaction time. CNC'd from billet aluminum with a true carbon fiber coil cover makes this solenoid 1.3 lbs lighter than the standard "Trash Can" solenoid and flows three times more nitrous!

Dimensions: 1.8" DIA. X 3.1" TALL

Amp Draw: 22 amps @ 13.8v

Inlet: 8AN O-ring

Outlet: 6AN O-ring
