Listwa paliwowa Honda K-series Radium Engineering

Cena brutto	769,00 zł
Cena netto	625,20 zł
Numer katalogowy	USA-RAD-20-0230-02

Opis produktu

PORTS AND FITTINGS The fuel rail ports are tapped for 8AN ORB. Fittings ARE NOT included with the fuel rail and must be purchased separately. 8AN ORB Adapter Fittings can be found [HERE](#). 8AN ORB Direct Mount Regulators can be found [HERE](#). 8AN ORB Fuel Pulse Dampers can be found [HERE](#). Fuel Pressure Gauge Adapters can be found [HERE](#). Appropriate fittings must be selected based on the specific application. Ample space around the fuel rail port(s) is necessary for larger accessories such as fuel pressure regulators, fuel pressure gauges, and fuel pulse dampers. To verify clearance, the dimensional drawings on the product pages can be used as a reference guide. **COMPATIBILITY** This fuel rail is compatible with all OEM Honda K-series intake manifolds (RBC, RBB, RRC, PRB, etc). If using an aftermarket manifold (Skunk2, etc) check with the manufacturer about fuel rail compatibility. If the manifold fits the OEM fuel rail, then the Radium fuel rail will also fit. **OVERVIEW** Manufactured with a large 0.69" internal bore, the fuel rail can support all necessary engine power requirements. They are CNC machined from extruded 6063 aluminum, media blasted, black anodized, and laser etched for a high quality surface finish. Like the OEM fuel rails, the injector bores are 14mm ID so factory injectors are permitted. The fuel rail is equipped with features to accept the OEM fuel injector clips (shown below). This kit is compatible with all fuel types including popular alcohol mixtures such as E85. The OEM insulating spacers (Honda P/N: 16638-PNA-000) are reused and phenolic washers are included to thermally insulate the fuel rail from the aluminum intake manifold. **FUEL INJECTOR COMPATIBILITY** This fuel rail is compatible with factory or OEM equivalent fuel injectors. If upgrading fuel injectors, consult your aftermarket injector supplier for details. Radium Engineering cannot specify any further injector dimensions other than stating 'OEM equivalent'. **CONFIGURATION** 20-0230-02 Fuel Rail, Honda K-Series This part only includes the fuel rail and the mounting hardware making it ideal for custom fuel plumbing applications. If using the stock fuel feed line, select the plumbing kit shown below. Included: -Black Anodized Laser Etched Aluminum Fuel Rail -Stainless Steel Mounting Hardware -Phenolic Thermal Insulating Washers Instruction PDF
