Mainline Stand Alone Fuel Enrichment (SAFE) System Nitrous Express NX 15003-3QT

Cena brutto	1 199,99 zł
Cena netto	975,60 zł
Cena poprzednia	1 419,25 zł
Dostępność	Na zamówienie
Numer katalogowy	331575576
Kod producenta	USA-NX-15003-3QT

Opis produktu

The Nitrous Express SAFE (Stand Alone Fuel Enrichment) system improves the performance of any nitrous system. The SAFE system includes a 3 quart, high-strength, composite fuel cell. This version of the SAFE System includes a low-pressure external fuel pump and non bypass style regulator.

This SAFE system is designed to run with non-boosted applications and will support up to 600 nitrous horsepower on pump gas or race gas. When used with race gas, the need to retard timing is significantly reduced. The SAFE system reduces the need to upgrade OEM fuel pumps.

This system does not come with any fittings or lines to leave the option of running rubber line or stainless braided. All threads will be 3/8 NPT.

- 3 Quart, high strength, composite fuel cell that can be mounted in most factory battery trays without modification.
- Pump will support up to 500 nitrous horsepower on gasoline or race fuel
- Fuel pressure can be adjusted from 5 to 12 psi

Note: This version will provide 5 - 12 psi fuel pressure. EFI nitrous systems will require new fuel jetting designed for 5-12psi fuel pressure. Not for use with boosted applications.

This system does not come with any fittings or lines to leave the option of running rubber line or stainless braided. All threads will be 3/8 NPT. Mounting hardware for the tank and regulator are not included.
