Mini (Gen 3) 2 Piece Underbody Brace Kit

Cena brutto	1 259,58 zł
Cena netto	1 259,58 zł
Dostępność	Na zamówienie
Numer katalogowy	379176101
Kod producenta	FMAMCSB

Opis produktu

The Underbody Brace kit was designed by our highly skilled Research and Development Team at Forge UK HQ. Using the best software on the market, we simulated structural tests on multiple designs to see which came out on top. Once the design was decided upon, sample braces were machined and bolted onto the vehicle for testing. After weeks of extensive R&D we concluded that our design was far more superior than the OEM - adding rigidity and support to the chassis and suspension.

Both braces are CNC machined at Forge UK HQ based in Gloucestershire, England from a single block of billet aluminium, and is the highest quality of 6000 series aluminium alloy. Following a quality control check, they are then anodised blue to give it an aesthetically pleasing and elite look. We offer our Limited Lifetime Warranty on the material and manufacturing process of the braces.

Due to the harsh environment of where they are fitted, we cannot offer a warranty on the anodised finish.

We managed to create a part that is incredibly simply to install and can even be fitted with the existing (OEM) bolts from the vehicle.

**** The upload date is shown as the part is still a production part on current vehicles**

Highlights

- *Developed to increase strength and rigidity over the OEM*
- *Precision CNC machined from a single billet of 6000 series Aluminium alloy*
- *Supplied with a blue anodised finish*
- *Designed in our dedicated Research and Development Facility in Gloucester in the UK*
- *Limited warranty on the material and manufacturing processes*
- *Simple to install. Remove OEM braces and install Forge braces with existing bolts*
