Numer katalogowy	331390456
Kod producenta	MMHOSE-Q50-16ANCBK

Opis produktu

The twin turbo VR30DDTT under the hood of the 2016+ Infiniti Q50 and Q60 churns out impressive power with minimal modifications and offers a tall ceiling if basic modifications don't reach your goals. This, combined with an optional AWD drivetrain puts the Q-series in a unique position within the Nissan/Infiniti lineup, one that certainly deserves attention from our engineering team. During development of our liquid-to-air intercooler our engineers noted that the factory rubber intercooler coolant hoses are a potential point of failure as the Q-platform begins to age. We set out to develop a replacement hose kit using durable silicone guaranteed to outlast and outperform your stock hoses. Mishimoto silicone hoses are constructed from five layers of silicone with embedded heat resistant fibers. The silicone construction improves heat tolerance, and the internal fiber layer provides higher pressure tolerance. In addition, silicone offers improved physical properties compared to EPDM rubber, making it more resilient to degradation over time. Our intercooler coolant hose kit includes a full set of stainless-steel worm gear clamps and each hose is labeled for ease of installation. We offer this kit in black, blue, or red. As with all our products, this kit includes our signature Mishimoto Lifetime Warranty.
