Mishimoto Aluminum -10AN Straight Fitting Black

Cena brutto	95,01 zł
Cena netto	77,24 zł
Dostępność	Na zamówienie
Numer katalogowy	331391201
Kod producenta	MMFT-SW-10-ST

Opis produktu

You've poured everything you have into your build. It is pure personal expression. Fully refreshed and upgraded suspension. Wheels and tires suited for your objectives. Track pads that squeal at every stop. Larger turbo for more power. But in the thrill of completion, you've muddled up the engine bay with a rat's nest of rubber lines. The smell of burnt rubber emanates as a rubber line sizzles next to the exhaust manifold. Oil stains reveal that your rubber PCV hose has been rubbing on an intake bracket, causing a rupture. You gaze over to the reused stock 20-year-old rubber fuel lines. Hairline cracks in the exterior rubber layer threaten to put a fiery end to this incredible machine. It's time to upgrade your engine bay with Mishimoto -AN braided lines and fittings. Mishimoto has released an extensive lineup of -AN line fittings, unions, reducers, and adapters to help complete your project. Mishimoto -AN line fittings feature furnace brazed tubing and ends made from precision CNC-machined durable 6061 aluminum. Each fitting features a corrosion-resistant anodized finish, providing a very sleek yet subtle appearance. Mishimoto -AN line ends feature a full 360-degree swivel, making routing and final install a breeze. Mishimoto -AN aluminum adapters and reducers make transitioning to other line sizes and types painless. Our braided line fittings are engineered to withstand substantial abuse, including extreme temperatures and high pressure. Whether you're building an oil cooler setup or putting together a turbocharger oil drain, trust Mishimoto -AN line fittings to get the job done right. As with all our products, Mishimoto -AN fittings include our signature Mishimoto Lifetime Warranty.
