Opis produktu

The Mishimoto Aluminum Oil Catch Can will prevent a harmful buildup of oil inside of the turbocharger, intake manifold, intercooler and piping. Our catch can prevents oil from getting into pressurized turbo plumbing and stops oil vapors from getting into the intake system that would ultimately lead to lower combustion temperatures and reduced overall efficiency. The polished Mishimoto Aluminum Oil Catch Can comes complete as a kit containing a mounting bracket, hose, all necessary clamps, fittings, and mounting hardware, for a perfect upgrade in performance and aesthetics for your car. This oil catch can, as with all our catch cans, comes with the unparalleled Mishimoto Lifetime Warranty you know and trust. Our catch cans are different from most air-oil-separator (AOS) systems on a few levels. First, our catch cans are not heated. This means that all of the blow-by is able to condense in the can, including low-octane oil vapors and contaminated fuel vapors. Most AOS systems also drain the blow-by back into the oil pan, while our catch cans trap the blow-by and keep it out of the engine permanently. If you've seen what we've seen in the bottom of our catch cans, you won't want that draining back into your oil either. Separates oil particles from PCV/CCV air. Diameter: 3.5" / Can Height: 6.3" / Overall Height: 7" Capacity: 900cc (30 fl. oz.) Defends intercooler, intake system, and essential components from oil blow-by. Mishimoto Lifetime Warranty
