Opis produktu

Increase the airflow to your 1.6L EcoBoost with the Mishimoto hot-side Fiesta ST intercooler pipe kit for the 2014+ Ford Fiesta ST. The stock hot-side Fiesta ST intercooler pipe is riddled with restrictive bends and small diameter sections that impede airflow. These Mishimoto intercooler pipes have a 2.5" diameter and are mandrel-bent to eliminate any restrictions. When you're turning up the boost on your Fiesta, these pipes will have no problem supporting the power you throw at them. These hot-side Fiesta ST intercooler pipes feature durable silicone couplers and stainless steel T-bolt clamps to insure leak free connections. Installation can be completed in under 30 minutes with no modifications to the engine bay, as Mishimoto's Fiesta ST intercooler piping is a direct fit and works with both the stock and Mishimoto performance Fiesta ST intercooler. The Mishimoto Fiesta ST hot-side intercooler pipe kit is available in either a polished or wrinkle black finish and, like all of our Fiesta ST parts, includes the Mishimoto Lifetime Warranty. Direct fit for the 2014+ Ford Fiesta ST. Dyno-proven gains of up to +4 whp and +5 wtq. Pipe Construction: Mandrel-Bent Aluminum Pipe Diameter: 2.5" Installs in under 30 minutes. Mishimoto Lifetime Warranty
