Dostępność	Na zamówienie
Numer katalogowy	331389130
Kod producenta	MMINT-FIST-14KPSL

Opis produktu

The 2014+ Ford Fiesta ST is a car that was born to have fun and push the limits of what a 4-cylinder hot-hatch can achieve. So why let your Fiesta ST be held back by the stock intercooler? With a light tube-and-fin construction, 51% larger core, and 25% greater internal volume, the Mishimoto Fiesta ST intercooler is the upgrade your Fiesta has been asking for. Proven to reduce charge-air temperatures by up to 26Å,Å°F (15Å,Å°C), this intercooler is efficient enough to keep up with even the hottest hatch.

Included in this kit are a set of air diversion plates that ensure as much air as possible passes through the outside of the intercooler. To make sure you're getting the maximum amount of air through the inside of the intercooler, this kit also includes our 2014+ Fiesta ST hot and cold-side intercooler pipes. Available in wrinkle black or polished silver, these pipes help customize your engine bay while providing your Fiesta with up to 7 more horsepower and 8 Ft/lbs of torque at the wheels. The 51% greater volume of the hot-side pipe, combined with the 22% larger volume of the cold-side pipe, means that you have plenty of room to grow your Fiesta's power.

With durable silicone couplers, fully TIG-welded construction, and Mishimoto's Lifetime Warranty, this intercooler and pipe kit will stand the test of time, and then some.
