Opis produktu

The Mishimoto 2014-2015 Ford Fiesta ST Silicone Induction Hose is precision engineered as a bolt-on upgrade in both performance and style. The 100% silicone hose is crafted with four-layers of silicone and heat-resistant embedded fibers for added strength. This 2014-2015 Fiesta ST kit replaces the small rubber induction hose with the superior silicone induction hose, which can tolerate much higher temperatures and internal vacuum. The CNC port is also permanently attached to the hose with a non-removable clamp, and comes with two silicone-safe worm-gear clamps, making installation easy! Mishimoto's 2014-2015 Fiesta ST silicone induction hose is more durable and will outlast the stock components substantially. To promote improved airflow, this hose has been designed with a smooth internal surface, unlike the accordion-style bends in stock hoses. Whether you are entering your 2014-2015 Fiesta ST in the local autocross, or lapping at your next track day, trust Mishimoto and our line of parts to keep your Fiesta ST cool. The Mishimoto 2014-2015 Fiesta ST Silicone Induction Hose Kit is available in black, blue, or red to match your styling preference. This kit, like our entire line of 2014-2015 Fiesta ST performance parts, includes the signature Mishimoto Lifetime Warranty. Direct fit for the 2014-2015 Ford Fiesta ST. STINNER DIAMETER: 2.8" OUTER DIAMETER: 3" Up to 5 whp / 10 wtq gains over the stock rubber induction hose. High grade silicone and heat-resistant embedded fibers feature max temp of 330Å,Å°F. Mishimoto Lifetime Warranty
