Mishimoto Ford Focus RS Hot-Side Intercooler Pipe Kit 2016-2018

Cena brutto	1 681,00 zł
Cena netto	1 366,67 zł
Dostępność	Na zamówienie
Numer katalogowy	331389076
Kod producenta	MMICP-RS-16HWBK

Opis produktu

To complete our intercooler component lineup for the 2016-2018 Ford Focus RS, we at Mishimoto would like to introduce our hot-side Intercooler Pipe. This pipe has a truly innovative design that helps cool more than just air intake temperatures. Not only does it increase internal volume by 40% over stock with 2.5" inch inlet and outlet diameters, and maintain an average pressure drop of 45%, the cast mid-section retains the use of the factory ducting that directs airflow to the front PTU. A standard cylindrical pipe restricts airflow, and this doesn't help the known problem of overheating drivetrains when the RS is being pushed to its limits. Our pipe is shaped to cleanly direct air right to the front PTU using that front duct, so airflow isn't lost like with a traditional pipe design. In addition, this pipe comes with 5-ply, wire-reinforced silicone to attach to the turbo and intercooler, providing superior heat resistance and flexibility to accommodate for engine movement. The pipe can also fit without removing the lower cross bar. The kit comes with all necessary hardware, is a direct fit with no modifications necessary, and is backed by the Mishimoto Lifetime Warranty. This Part Fits: Year Make Model Submodel 2016-2018 Ford Focus RS
