Opis produktu

Reduce the restriction and add more volume to the flow of charged air in your 2016-2018 Ford Focus RS with the Mishimoto Performance Intercooler Piping kit. We have combined the power of our hot-side and cold-side kits to give you the best airways to and from the intercooler in your Focus RS. Our cold-side pipe is a single section of durable 5-ply silicone, eliminating the need for additional couplers. The improved design is flexible enough to make installation a breeze, and is reinforced with steel wire to stand up to the same abuse as it's aluminum counterpart. We have also increased the inner diameter of the cold-side pipe, equating to a 31% increase in internal volume and a 46% increase in flow over the stock piping. Our cold-side piping is available in black and its full potential is unlocked when combined with our hot-side kit. Since the hot-side has more distance to travel, we incorporated a specially designed aluminum mid-section and united it with a pair of dependable silicone couplers, all to make sure your Mk.III RS keeps every precious PSI of boost contained in the system. On top of increasing the diameter to 2.5 inches, our hot-side piping is designed specifically to direct airflow to the front PTU cooler that would be blocked by a traditional piping design. Our air diverting hot-side pipe includes wire-reinforced, 5-ply silicone couplers to ensure a secure connection to the turbo and intercooler. The Mishimoto Performance Intercooler Piping Kit is available in black and includes all the hardware needed for a fortified and direct fitment to your 2016-2018 Ford Focus RS. As with all our products, this kit also includes the Mishimoto Lifetime Warranty. This Part Fits: Year Make Model Submodel 2016-2018 Ford Focus RS
