Opis produktu

Looking for a way to improve spool-up, increase power potential, and improve engine bay aesthetics on your EcoBoost Mustang? Mishimoto has you covered with a new cold-side intercooler pipe designed specifically for the 2015+ Ford Mustang EcoBoost. This EcoBoost Mustang kit features 2.75" mandrel-bent aluminum piping for smooth airflow, and four-layer silicone couplers with heat-resistant embedded fibers for improved tolerance against heat and pressure. The Mishimoto engineers include a CNC-Machined NPT bung near the throttle body for the easy addition of water/meth injection or a boost gauge. This 2015 Mustang kit also includes high-quality stainless steel T-bolt clamps for consistent and reliable holding power. Installation on your 2015 Mustang is simple, requires no modification to any parts in the engine bay, and can be completed in under 30 minutes. The Mishimoto Mustang EcoBoost Cold-Side Intercooler Pipe Kit is available in either polished or wrinkle black finish and like our entire line of Mustang parts, includes the Mishimoto Lifetime Warranty.

- Direct fit for the 2015+ Ford Mustang EcoBoost
- Pipe Construction: Mandrel-Bent Aluminum Pipe Diameter: 2.75"
- CNC-machined area for quick install of meth injection or a boost gauge
- Replaces weak stock cold-side rubber intercooler hose
- Mishimoto Lifetime Warranty
