Opis produktu

Whether you are carving corners with the top down or blasting down the drag strip, your high-revving S2000 needs a reliable and effective cooling system. Mishimoto is proud to release an all-new, direct-fit oil cooler kit engineered and designed specifically for the AP1 and AP2 Honda S2000. This kit utilizes a large 19-row oil cooler mounted in the front grill for optimum airflow and cooling capability. It includes preassembled stainless steel lines and S2000 specific mounting brackets for a painless and clean installation. The Mishimoto oil cooler kit increases overall oil capacity by .6 qt and significantly reduces temperatures while maintaining minimal pressure drop. This kit is available with a thermostatic sandwich plate for additional oil-temperature control, and your choice of a stealth black or silver cooler. As with all our products, this kit includes the Mishimoto Lifetime Warranty. Direct fit for 2000-2009 Honda S2000. Oil cooler kit retains the use of your stock liquid to liquid oil cooler unit. Minimal pressure loss with dramatic temperature drop. Thermostatic oil sandwich plate allows oil to reach optimum temperature. Mishimoto Lifetime Warranty.
