Kod producenta	MMOC-EVO-01BK

Opis produktu

The Lancer Evolution is a great vehicle for sliding around back roads, plowing through the straightaway at a road course, or just picking up the kids from school. The turbocharged four cylinder demands an effective and reliable cooling system to perform at its best. The Mitsubishi Lancer Evolution 7/8/9 Oil Cooler Kit is ideal for reducing temperatures in your street or track Evo. This kit places a large 25-row cooler in the front bumper for optimum airflow and cooling efficiency.

This oil cooler kit includes direct-fit, application-specific brackets and durable preassembled stainless steel oil lines with -10AN fittings for a bolt-on installation that completely replaces your stock oil-cooling unit. The large and efficient Mishimoto 25-row, stacked-plate oil cooler will decrease oil temperatures by up to 30 degrees and reduce oil degradation, resulting in proper lubrication of engine and turbocharger components, even under the stress of competitive driving.

Combine this oil cooler kit with the [Mishimoto Lancer Evolution Performance Aluminum Radiator](#) and [silicone radiator hose kit](#) for complete control over your engine fluid temperatures! As with all our products, this kit includes the Mishimoto Lifetime Warranty.

- Direct fit for 2001-2007 Mitsubishi Lancer Evolution 7/8/9
- Temperature Difference: 20-30°F / Pressure Drop: 2-3 PSI
- Application-specific mounting brackets for easy install
- Large 25-row cooler located in front bumper for optimum airflow
- Mishimoto Lifetime Warranty
