### Opis produktu

The engineers at BMW did an excellent job striking balance between exceptional power and cooling in the latest generation of BMW G8X M3 and M4 models. Unfortunately, this meant positioning components, namely the oil cooler, in precarious positions. Placed on the undercarriage and parallel to the road's surface, the G8X oil cooler is vulnerable to bumps, scrapes, debris, and other road hazards.

The engineers at Mishimoto recognized this shortcoming while developing the Mishimoto 2021+ BMW G8X M3/M4 performance oil cooler, and in Mishimoto fashion, pushed the limits to construct the Mishimoto 2021+ BMW G8X M3/M4 skid plate! This skid plate is constructed from light-weight aluminum and features a precise, cross-cut design to protect your stock or Mishimoto performance oil cooler from bumps, scrapes, and punctures. It includes a corrosion-resistant black powder-coat finish and comes with everything needed for a smooth and simple installation - no cutting or modifications necessary!

As with all our products, the Mishimoto 2021+ BMW G8X M3/M4 skid plate comes with our signature Mishimoto Lifetime Warranty for a lifetime of protection.

- **MATERIAL:** 5052-Aluminum
- **LENGTH (INCHES):** 35.8
- **OVERALL HEIGHT (INCHES):** 24
- **CHASSIS CODES:** G80 / G82 / G83 / G87
- **APPLICATIONS:** BMW G80 M3 I6 3.0L 2021+
- **ENGINE CODES:** S58B30
- **NOTE:** Fitment with Competition Sport (CS) models may require enlarging holes in the front splitter.

### Key Features:

- Direct fit for 2021+ BMW G8X M3/M4
- Mishimoto Lifetime Warranty
- No cutting or modifications required
- Fits both stock and Mishimoto oil coolers
- Constructed from lightweight aluminum and powercoated for a durable, corrosion resistant finish
- Protects engine and oil cooler from damage
- All required hardware included
- Recessed mounting hardware provides smooth surface to avoid snagging on obstacles or shearing mounting bolts
- Protective cross-cuts keep your oil cooler safe from punctures caused by debris
