Mishimoto Universal -8AN 10 Row Oil Cooler Gold

Cena brutto	661,00 zł
Cena netto	537,40 zł
Dostępność	Na zamówienie
Numer katalogowy	331390685
Kod producenta	MMOC-10-8GD

Opis produktu

Maintaining appropriate fluid temperatures is key to extending the life of your vehicle's engine, transmission, differential, and accessories. Each fluid associated with these systems is specifically designed to operate within a certain temperature and pressure range, ensuring proper lubrication and reduced wear. When a vehicle is extensively modified and/or used in high stress driving conditions, it is easy to exceed the limits of these fluids, resulting in reduced lubrication and higher potential for wear and damage. The simple addition of an ancillary fluid cooler is an easy way to reduce temperatures and bring them back into the effective range for proper lubrication. Mishimoto engineers have designed this 10-row stacked plate fluid cooler to provide substantial heat transfer and reduced temperatures. Our fluid cooler is applicable for use with engine oil, transmission fluid, gear oil, and power steering fluid. This heat exchanger includes eight universal mounting holes, providing an abundance of options for mounting on your vehicle. Each cooler includes brazed -8AN inlet and outlet fittings, ensuring leak-free operation. Mishimoto 10-row -8AN fluid coolers are available in silver, black, or gold powder coated finishes. Be sure to pair with our -8AN Braided Hoses and -8AN Aluminum Fittings to complete your ancillary cooler installation. As with all our products, this 10-row fluid cooler includes our signature Lifetime Warranty.
