Cena brutto	<b>1 491,01 zł</b>
Cena netto	<b>1 212,20 zł</b>
Dostępność	<b>Na zamówienie</b>
Numer katalogowy	<b>331389422</b>
Kod producenta	<b>MMOC-DP-SSL</b>

### Opis produktu

As anyone who's spent some time on the track will tell you, one of the most important things to keep under control while pushing the limits of your vehicle is oil temperature. Oil that gets too hot will lose its viscosity, which is the very characteristic that makes it thick, slippery, and useful for lubrication. Adding a Mishimoto race oil cooler to your ride will ensure that your oil stays cool enough to do its job, extending the life of the high-wear components within your block and letting you focus not on keeping things cool, but taking home the checkered flag. Available in your choice of sleek silver or stealth black, this particular oil cooler features a dual pass core - oil enters one side, travels around the core, and exits again on the same side. Ideal for tight situations, Mishimoto's small dual pass oil cooler will help keep temperatures in check while you shoot for the podium finish.
