Opis produktu

The exquisite MMR Performance Big Brake Kit for F56 Mini uses our own forged monoblock 6-piston calipers, paired with 355mm fully-floating two-piece discs. Precision machined to deliver breathtaking stopping performance whether in extreme fast road, or race conditions. The MMR Performance 6-piston front brake upgrade for the F56 MINI is simply a level above anything else on the market for this platform. Designed without compromise for ultimate stopping performance, it's packed with motorsport-inspired features, bringing a true supercar look and feel in the braking department. At the heart of our brake kit is the lightweight Forged Monoblock Calipers. Rather than two halves bolted together, they're a one-piece construction that starts life as an ultra-strong forged billet. From this billet, extensive 5-axis CNC machining operations give each caliper its stunning finish. It's a construction technique usually reserved only for the highest-specification motorsport brake setups and ensures the ultimate stopping performance when used in extreme road, or race conditions. The result is a 6-piston caliper that is both stiffer and lighter than any other, combined with exceptional cooling characteristics and stunning detailing. The thin-profile calipers give extreme stiffness and light weight, and aid in wheel clearance packaging - requiring no spacer to fit behind OEM 18" wheels. Finally, we offer a colour choice of either Bright Red, Graphite Grey, Metallic Blue or stunning Nickel Chrome finish. The calipers are mated with a set of our high-performance 355mm diameter with 32mm thickness fully-floating high cast carbon two-piece disc assemblies giving a far higher friction coefficient compared to normal steel rotors. These require a minimum of 18" wheel. The discs themselves feature a directional curved vein to aid cooling, so reducing the effect of fade. Fully floating mounting between disc and bell allow for thermal expansion and contraction to avoid cracking. The anti-rattle mounts keep it quiet. A full fitting kit is included: bolt on and drive! WHAT'S IN THE BOX? T-6061 6-piston forged monoblock calipers - for ultimate strength and rigidity FC-25 Carbon steel two-piece fully-floating 355mm discs MMR Performance fast-road pads (uses common AP6 pad profile) Billet steel caliper brackets MMR Performance braided front brake lines All required fitting hardware Applications Series Model Code Year Variant Engine Code Mini F56 2013+ Cooper Cooper S Cooper SD Cooper JCW All
