Opis produktu

Produced from the highest quality uv-resistant materials, the three-piece MMR side decal kit is a great addition for your Mini. Available in satin black. Everyone loves the look of our stylish MMR Mini three-piece decal kit. Now they're available to give your car the same classy upgrade. Produced from the highest quality uv-resistant materials, the MMR decal kit is the perfect finishing touch for any F5x Mini. With a carefully-developed shape, they really add a dynamic styling element to your Mini's bodysides and bonnet. They are supplied as a left and right pair of side stripes, plus 'M300' branded bonnet graphic. For best results, ideally need to be installed by someone with fitting experience with vehicle graphics. Available in satin black with the MMR logo at the front of the sidestripe, to locate at the front of the door. The logo is cut out of the vinyl to allow your body colour to show through. Please note - these are a universal kit that will need to be cut around door shuts (to allow for 3/5 door bodies). Please note, because of the length, these are only suitable for the F5x cars.
