MMR High Performance Intercooler for BMW 120D 123D 320D N47 2006-2013

Cena brutto	3 259,99 zł
Cena netto	2 650,40 zł
Numer katalogowy	MMR05-0101

Opis produktu

Keep cool with the MMR Performance Intercooler for the BMW N47-powered 2.0 diesel 120d, 123d and 320d. Improve power and torque output significantly by substantially reducing charge air temperatures from the super efficient tube and fin stepped core - with 90% larger frontal area and 37% more internal volume than OE. The MMR Performance intercooler for the N47-powered 2.0 120d, 123d and 320d improves power and torque output significantly by substantially reducing charge air temperatures versus the OE cooling setup. Using a large tube and fin stepped core, our performance intercooler provides literally double the frontal area and almost 40% more volume than OE, too. The core itself uses internal turbulators to improve its cooling performance and the CFD optimised cast end tanks assist with maintaining the best possible airflow across the core. Despite the large core size, due to the tube and fin construction the intercooler weights just 5.4kg whilst still providing the best solution possible when power output and low air charge temperatures with minimal pressure drop are required. Features 520mm x 200mm x 100mm tube and fin stepped core 90% larger frontal area than OE 37% more internal volume than OE Delivers substantial temperature drop across the core, with minimal impact on pressure drop Anti-corrosive thermal coating Easy installation, not cutting or permanent modification to the vehicle required Application Series Model Code Year Variant Engine Code 1 Series E81 E87 E88 E82 2006-2013 120d 123d N47 2 Series E90 E91 E92 E93 2007-2012 320d 320xd N47
