### Opis produktu

MMX Magnetic oil sump plug for S63 BMW

The MMX Performance BMW magnetic sump plug is a simple yet effective upgrade that can dramatically increase your engine's lifespan. As an engine wears, tiny metallic particles become suspended in the oil, accelerating wear each time you drive. Our magnetic sump plugs will help to separate these ferrous particles out.

### M18 x 1.5 Magnetic sump plug. Catch ferrous particles before they catch you.

There's no avoiding it, your engine's contact surfaces wear a tiny amount each time it runs. So, it becomes inevitable that tiny ferrous particles become suspended in the oil. They quickly make their way around your engine via the oil system for thousands of miles traveling over sensitive components such as your crankshaft bearings or camshaft caps, slowly contributing to increased engine wear.

Our magnetic sump plug has a large surface area magnetic end, which helps to catch metal particles. And of course, the harder your engine works, the greater the risk of this nasty metallic debris, meaning the greater the benefit of using our magnetic sump plug.

The MMX Performance magnetic sump plug is crafted from T6-6061 lightweight aluminium and is anodised in our trademark gloss black finish. It's supplied with a set of 5 sealing washers included (additional packs of washers can be ordered).

Insist on an MMX magnetic sump plug at your next service!

#### Product features

- Full OE plug replacement.
- M18 x 1.5 fitment.
- Protect and increase engine lifespan.
- Crafted from T6-6061 lightweight aluminium.
- Anodised in our trademark gloss black finish.
- Supplied with a set of 5 sealing washers.

#### Fitting informations

Our magnetic sump plug will fit all S63 BMW engines with a thread of M18 x 1.5.

#### Fitting guide

Match OE torque specs.
