Muffler Delete for Hyundai I20N

Cena brutto	634,14 zł
Cena netto	634,14 zł
Dostępność	Na zamówienie
Numer katalogowy	379177324
Kod producenta	FMMD7
Kod EAN	*5056721233833*

Opis produktu

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone with a high temperature external iron oxide engineered solution
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- CNC machined 6061 aircraft grade aluminium coupler
- Improved turbo air flow
- Increased audible sound from turbo
- Direct replacement of OEM parts
- Limited Lifetime warranty*

FMMD7 is our turbo muffler delete kit for the Hyundai I20N, this kit replaces the original restrictive compressor outlet with our smooth and turbulence free solution.

The OEM part is located on the outlet of the turbo compressor and its only function is to eliminate as much of the engines acoustics as possible. Where it does a good job of quietening down the audible sounds from the turbo it also disrupts the airflow in an area where it's not needed.

With Forge Motorsports expertise in this area, we have developed a kit which has removed this baffled chamber in favour with our CNC machined billet adaptor which now creates a smooth transition and uninterrupted air flow track to the intercooler, this aids to increase airflow to the engine adding extra performance especially on tuned vehicles.

A new hose design has been made with an increased internal volume and a construction of fluorosilicone internal and iron oxide external which is designed to withstand extremely high temperatures and pressures, this is why Forge Motorsport gives this product its legendary **LIFETIME warranty**.

All of these improvements have now created an **improved throttle response** and an improved ambience due to the increased turbo acoustics. Installation has been made straight forward with the inclusion of detailed step by step instructions.

This is the **perfect replacement for the OEM hose which has a history of premature failure**. The hose is only available in Red Ocre, as the material used in the construction of this hose has the best **heat resistant characteristics**

Complimentary Products

Our [uprated valve](#) for the Hyundai i20N and the Elantra N Line has been **expertly manufactured** and designed in the UK, meaning we can provide the industry leading valve for your vehicle. Specifically designed for the Hyundai, this valve can be used either as a fully
