Opis produktu

Protect your wheels with Mishimoto's new 5-Piece Non-Marring ½" Wheel Nut Socket Set! If you've invested a lot into your vehicle's wheels, it makes sense to ensure the finish is protected during wheel removal and installation. Our new non-marring wheel nut socket set includes a complete set of standard metric wheel nut sizes from 15mm to 22mm. The core of our sockets is impact-grade Chromoly steel which provides superior strength for high torque applications. These sockets are applicable with ½" hand tools or electric/pneumatic impact tools. These sockets also feature a hollow core design which allows for use on vehicles with extended studs. In addition, we've designed this set with 6-point ends, ensuring precise engagement and reduced slip during torquing. Mishimoto wheel nut sockets feature color-coded and laser-etched sizing to make identification easy. This kit is packaged with a small carrying case ensuring easy storage and transportation. As with all our products, this kit includes our signature Mishimoto Lifetime Warranty.
