Opis produktu

Nitrous Plate System (50-150Hp) for Nissan Gt-R R35

Nitrous Express has combined performance, quality and easy installation in this new nitrous system engineered specifically for the Nissan GTR. The system includes twin billet aluminum nitrous plates that bolt between the throttle bodies and the intake manifold for an easy install and excellent aesthetics. This system includes an Autolearn TPS module which allows the nitrous to activate only at wide open throttle. A direct-plug-in Fuel Line Adapter is provided to simplify installation (no need to cut your factory fuel lines). This system also includes billet aluminum and carbon fiber Lightning series solenoids, stainless braided N2O line, master arming switch, relay, relay harness and all necessary hardware to complete the installation. Includes jetting for 50, 75, 100, 125, and 150HP. Systems with bottles include the billet aluminum lightning 500 bottle valve and stainless bottle brackets.

If you have an aftermarket engine management system that is capable of adding nitrous enrichment fuel and want this system DRY (no fuel components), please contact us
