Opis produktu

Nitrous Plate System for Honda Talon SXS

Nitrous Express is proud to offer you the first nitrous plate system designed specifically for a Honda 1000!

This NX nitrous plate system bolts between the throttle body and the intake boots and provides up to 100 additional horsepower at the flip of a switch. The nitrous and fuel solenoids are made from billet aluminum and carbon fiber for the best performance and weight savings possible.

The system includes an electronic WOT switch. So the nitrous only activates at full throttle and de-activates when you let your foot off the accelerator pedal. The entire Honda Talon nitrous kit can be installed in one afternoon with common hand tools and will transform your Honda into a monster!

Includes:

- Billet Aluminum Nitrous Plate with Integrated Nitrous and Fuel Solenoids.
- TPS Sensing WOT Switch.
- Stainless Braided Nitrous and Fuel Lines.
- Nitrous System Arm Switch.
- Jetting from 10-40hp
- 40 Amp Relay and Harness
- Hardware Pack to Complete Installation
