Opis produktu

Nitrous System for The Wildcat 1000 SXS without Bottle

Nitrous Express is proud to offer you the first nitrous system designed specifically for the Wildcat® 1000! This NX nitrous system allows you to put a nitrous/fuel nozzle between the cylinder head and the throttle body of Wildcat® 1000's and provides up to 25 additional horsepower at the flip of a switch. This system includes NX Lightning series solenoids which are made from billet aluminum and carbon fiber to provide the ultimate in performance, durability and weight savings. The system includes aTPS activated wide open throttle switch so the nitrous only activates at full throttle and automatically deactivates when you let your foot off the accelerator pedal. An additional fuel pump and fuel filter is included so there is no need to worry about upgrading your factory fuel system. The entire system can be installed in one afternoon with normal hand tools and will transform your Wildcat® 1000 into a fire breathing Lion!

Complete with:

- Lightning Series nitrous and fuel solenoids
- · braided stainless hoses
- · Piranha nozzles
- · fuel pump
- relay
- microswitch
- · arming switch
- jetting for 10,15,20 or 25HP
