Opis produktu

Nitrous System with 10Lb Bottle for Dodge Dart 2.0L (35-100Hp)

Nitrous Express has officially released a new nitrous system designed specifically for 2013-up Dodge Dart applications with the 2.0L engine. The Nitrous Express Dart Plate Systems feature Spraybarless technology for the ultimate in atomization and distribution. The billet plate bolts between the throttle body and intake making installation quick and easy. The solenoids are integrated into the plate for a super clean look. A direct-plug-in Fuel Line Adapter is provided to simplify installation (no need to cut your factory fuel lines). This system includes a TPS Wide Open Throttle Switch so the nitrous only activates at wide open throttle and automatically turns off when you decelerate. The system includes jetting for 35, 50, 75, and 100 horsepower. Systems include 15 foot stainless braided nitrous line, master arming switch, relay, relay harness and all necessary hardware to complete the installation. Includes a 5lb, 10lb or 15lb nitrous bottle with the billet aluminum Lightning 500 bottle valve and stainless bottle brackets.

If you have an aftermarket engine management system that is capable of adding nitrous enrichment fuel and want this system DRY (no fuel components), please contact us
