Opis produktu

Nuke Performance Adjustable Aluminum Cam Pulley for Toyota 1JZ-GTE and 2JZ-GTE (non-VVTi) engines, precision engineered in Sweden. Take your Toyota 1JZ-GTE and 2JZ-GTE engine to the next level with the Nuke Performance Adjustable Aluminum Cam Pulley, precision-engineered for Toyota 1JZ/2JZ-GTE engines. +/- 11° timing adjustment for precision tuning. High-strength aluminum cam pulley Hard-anodized outer gear for minimum wear over time Unique bolt washers that optimize tension during racing Abrasion-resistant Helicoil inserts Precision Engineered for 1JZ-GTE & 2JZ-GTE Engines Specifically engineered for the 1JZ-GTE and 2JZ-GTE (Non-VVTi) engines found in iconic Toyota models. These engines have become the top choice for drifting, time attack, and racing, offering exceptional fitment and compatibility for high-performance builds. Made from lightweight, CNC-machined 6082 aluminum, providing strength, reduced rotational mass, and improved engine responsiveness. Fine-tune your valve timing for maximum performance gains in both naturally aspirated and forced induction setups, enhancing power, torque, and overall engine efficiency. Anodized Finish for Long-Lasting Resistance to Corrosion, Wear, Heat, and the Demands of Intense Racing. It comes with a durable anodized coating for long-lasting resistance against corrosion, wear, and heat, keeping your engine bay looking sharp and professional. Whether you're on the track or street, this adjustable cam pulley delivers the precision and reliability you need to get the most out of your Toyota 1JZ-GTE and 2JZ-GTE engines. Adjustable +/- 11° for precision tuning The stainless steel bolts use our unique bolt washers that optimize tension during heavy use on high-performance engines, and with the Helicoil thread inserts you get a rigid bolt lock even after several adjustments without the need of adhesive to get the gears to stay in their set position. Crafted in Collaboration with World-Leading Tuners, Trusted by Racers and Enthusiasts. The Toyota 1JZ-GTE / 2JZ-GTE cam pulleys from Nuke Performance have rapidly gained popularity among top engine builders worldwide—thanks to their unmatched quality and performance, perfectly tailored for these legendary engines. Designed and developed in-house by Nuke Performance in Sweden, they deliver exceptional functionality and set a new standard in precision and reliability. Adjustable Cam Pulley Toyota 1JZ-GTE / 2JZ-GTE Specifications: For more information about specifications, contact us. Used on engine Toyota 1JZ-GTE / Toyota 2JZ-GTE Material Aluminum 6082 alloy Tightening torque 17 NM Diameter 121mm (4.76") Depth 32mm (1.26") Weight 510g (1.12 lbs) Timing adjustment +/- 11° Part # 500-03-201 EAN 7340209507287 Adjustable Cam Pulley Toyota 1JZ-GTE / 2JZ-GTE includes: 1 x Adjustable Cam Pulley for Toyota 1JZ-GTE / 2JZ-GTE
