### Opis produktu

Nuke Performance Safety Prop for the Air Jack 90 Competition: Secures the Air Jack pistons when lifted. When using the Nuke Performance 90C Air Jacks, we advocate the utmost care and always use our sturdy and safe safety props to prevent an accident if the pressure disappears due to leakage, malfunction, or handling error. Securely clips onto the onboard air jack pistons. Prevents accidents when working under a raised vehicle. Practical handle for easy and safe operation. Anodized for long and lasting durability. Delivered in a practical and durable carry bag. The Nuke Performance 90C Safety Prop simply clips securely into place when the air jack is fully extended and is equipped with an easy to use handle. If you order 2, 3 or 4 props, they will come in a practical and durable carry bag. Locks the Air Jack in a safe and extended position. The Nuke Performance Air Jack 90 Competition Safety Props are designed to be used with the 90C series of Nuke Performance 8 BAR (120 PSI) Air Jacks. When the piston is fully extended it clips easily and securely to the piston and reduces the risk of injuries in case pressure disappears due to leakage, malfunction or handling error. Manufactured by high strength aluminum extrusion to maintain the highest functionality, finish and quality to cope with the great forces they are exposed to when the entire weight of the vehicle rests on it as designed. Durable and easy-to-handle bag for storage. When ordering 2 or more safety props, we deliver them in a durable and practical carry bag with a sturdy handle that makes it easy to store them among other equipment both when you are on the track and in the workshop. Made in Sweden, guaranteeing the highest possible quality. The 90 Competition Air Jacks and Safety Props are developed, designed and manufactured by Nuke Performance for the highest possible quality and with the same hallmark as all the other parts in the lightweight motorsports range. There is no substitute for the quality of Nuke Performance! Technical information : • Body made of high strength, CNC machined aluminum extrusion. • Lightweight design for motorsports use. • Anodized finish for long lasting function and corrosion-free appearance. Measurements : Length : 258 mm (10.15") Grip length : 150 mm (5.90") Diameter : 69 mm (2.71") Depth : 95 mm (3.74") Weight : 530 g (1.16 LB)
