Opis produktu

Nuke Performance Filler Cap and Fuel Hose Kit Steel Bracket with M6 Bolts for CFC Unit

Featuring a lightweight design, quick lock mechanism, and a 5-bolt pattern, this filler cap is the ultimate solution for easy, secure installation on your aftermarket fuel cell or Nuke Performance CFC Units. With just a 90-degree turn, you can lock and unlock the cap with ease.

- Quick lock filler cap, with a 90-degree lock mechanism
- 50mm (2") anti-static nylon fuel filler hose
- Extremely lightweight and flexible fuel filler hose
- Universal fitment for your motorsports build
- Safe for all types of fuels, including alcoholic fuels
- Kit fits straight onto a CFC Unit equipped fuel cell

Simplify your CFC Unit fuel-filling process with the Nuke Performance Filler cap and fuel hose kit for CFC Units. With its 5-bolt pattern and easy-to-use mounting accessories, installation is a breeze. This filler cap is compatible with standard gas station nozzles and fuel jug filler hoses, and it's safe for use with all types of fuels, including E85 and other alcoholic fuels. Thanks to the Viton seals and gaskets, you can trust that it will hold up to even the most demanding conditions.

A filler cap with a true quick-lock mechanism that takes not more than a 90-degree turn to lock the filler cap into place.

The Nuke Performance Remote quick lock filler cap is a piece of art, and we promise you that you will get addicted, opening and closing this aluminum masterpiece will blow your mind. With its easy 90-degree turn quick-lock mechanism, you can unlock and lock the cap with ease, making it perfect for motorsports applications where a remote filler solution is needed. It features a barb connection that fits onto the 50mm (2") fuel filler hose.

- Safe for all types of fuel, including alcoholic fuels
- The barb connection fits onto a 50mm (2") fuel hose

Not only is this filler cap extremely convenient to use, but it's also built to last. It's safe for use with all types of fuels, including ethanol and methanol, and its durable construction means you can count on it to perform in even the most demanding conditions.

The Nuke Performance Fuel Filler Hose Kit is the perfect solution for all of your fuel-filling needs. Its anti-static corrugated design allows for maximum flexibility.

Thanks to the fuel-filling hose's lightweight construction, an 80% weight savings in comparison to commonly used aftermarket 50mm (2") fill hoses is achieved, which means it won't add unnecessary weight to your vehicle, making it ideal for motorsports applications.

- Extremely flexible thanks to its corrugated design
- Very lightweight, with up to 80% weight savings
- Anti-static nylon hose and Viton bushings

The Nuke Performance fuel filler hose is also highly durable, able to handle all types of fuels including E85 and other alcoholic fuels, even during long time periods. It is perfect for use with aftermarket fuel cells such as ATL, Pyrotec, AluCell, Fuel Safe, and others, and can easily connect to a remote fill neck or OEM filler cap. Whether you're using it in motorsports or just need a reliable and flexible fuel transfer hose for your vehicle, this hose has you covered.
