## Odyssey Extreme Racing 40 PHCA 1100/45 AH Competition Battery

Cena brutto	<b>1 284,99 zł</b>
Cena netto	<b>1 044,71 zł</b>
Numer katalogowy	<b>ODY-EXTREME-40</b>

### Opis produktu

ODYSSEY Extreme Racing 40 battery This battery intended for a use in competition allows a saving of place and weight. Indeed, it contains more energy for the same volume. Solid construction thanks to the reinforced welds. The battery allows a start even with only 20% of the capacity. Its residual capacity is greater and the mass efficiency is higher, at least 30%. Storage without use for up to 2 years. ATTENTION: Please read the enclosed operating instructions in PDF! In order for your battery to last a long time, it is imperative to keep it close to full charge, i.e. around 12.8 V. In order to ensure a correct charge, it is imperative to use a specific charger such as C-Tek which ensures a 100% charge (even 108% on certain models). A conventional charger will charge your Odyssey battery up to 80%. Tightening torque of the lugs: 6.8Nm Operating temperatures : -40°C to +60°C ODDYSSEY Extreme Racing 15 Starting power (5 secondes) 1100 Dimensions (mm) Available current at -18° (30 seconds: up to 7.2v) 500 - Length 250 Rated capacity (Available amperage / 20 hours) 50 - Width 97 Available amperage / 10 hours 45 - Height 206 Capacity reserve (minutes)\* 87 Weight (Kg) 12.5 Short-circuit current (Amp) 2450 Internal resistance (m Ohm) 3.9 \*Number of minutes during which the battery can deliver 25A at 25° up to a stop voltage of 10.5V The GT2i Team's advice: never use a battery with a voltage lower than 11.50V! The non-observance of these instructions will lead to a non-application of the guarantee.
