Opis produktu

Discover ultimate performance with our Performance Intercooler Kit EVO1 for the Porsche 997 Turbo.

Our Performance high performance intercoolers are designed for true performance enthusiasts who want to get the most out of their Porsche 997 Turbo. With generous mesh dimensions of 355 mm x 220 mm x 90 mm = 7,029 cc, our intercoolers offer an expanded flow area and an impressive 17% more charge air volume compared to the original intercoolers.

Our performance intercooler network ensures outstanding cooling performance, even under extreme conditions. Whether on the track or on the street, your engine will always remain within an optimal temperature range.

Despite their extended dimensions, our high-performance intercoolers are amazingly lightweight, minimizing vehicle mass while maximizing performance. CAD designed free-form cast aluminum end boxes optimize internal airflow for maximum efficiency.

Our kit is a completely ready-to-install kit that can be seamlessly swapped out for stock intercoolers with minor adjustments to the original air ducts. Silicone hoses are included to ensure a perfect fit.

Tested up to 6 bar, our intercoolers guarantee reliable and pressure stable performance. Perfect for performance enhancing measures and racing.

All our products are subject to strict qualitative monitoring. Your satisfaction and the performance of your vehicle are our top priority.

Enhance the performance and driving experience of your Porsche 997 Turbo with our Performance Intercooler Kit EVO1. Experience ultimate performance, reliability and cooling power at a new level.

The performance intercooler upgrade kit for Porsche 911 Turbo (S) 997:
Porsche 997 Turbo (2006-2008) 353KW / 480PS
