Opis produktu

Enrich your driving experience with the innovative Wagner Tuning performance intercooler for Audi RS6/ RS7 and Audi S6/ S7 models with the powerful 4.0L V8 biturbo engine. Immerse yourself in a world of supreme power and impressive performance. The Audi RS6/ RS7 and Audi S6/ S7 feature an indirect intercooler circuit where the charge air is cooled by a water-cooled intercooler. On this vehicle, the intercooler sits specifically in the hot V of the engine to provide optimal cooling. Our unique Wagner Tuning performance intercooler was developed specifically for the demanding requirements of RS models. With a high quality intercooler core, it offers 118% more external core volume compared to the original. The ratio between the internal and external cooling surface ensures maximum heat transfer while allowing optimal internal airflow. Through CFD simulations, the end boxes were developed from high-quality aluminum chill casting to ensure optimal airflow conditions. The result is outstanding cooling properties with minimal back pressure. This kit is therefore also ideally suited for racing. Experience optimal cooling of the charged air with a significant increase in performance! Our Wagner Tuning charge air coolers are equipped with a heat-conducting anti-corrosion coating to ensure lasting durability. The installation of the system is uncomplicated and plug & play thanks to our simple installation instructions. Benefit from the numerous advantages of this product: - Significantly improved cooling performance with up to 40°C cooler intake air temperatures. - Maximum mechanical and thermal relief for the turbocharger - More power and torque for your engine - 100% pressure resistance - 100% plug-and-play without modifications - 4x 1/8 NPT ports for measuring additional parameters - Suitable for all power levels Treat yourself to the ultimate performance upgrade for your Audi RS6/ RS7 and Audi S6/ S7 and experience a driving experience that will thrill you. Opt for the Wagner Tuning performance intercooler and take your vehicle to a new level of performance and dynamics.
